	8 000 EURO	
BUGET ALOCAT ULBS:	80 000 euro	
SCURTĂ DESCRIERE A PROIECTULUI (max. 350 caractere)	<p>AGGREGATE aims to empower Cambodian higher education institutions to play a transformative role in the country’s green and inclusive economic transition. Anchored in the Erasmus+ Capacity Building in Higher Education framework and aligned with the Asia Region Priority “Green Deal,” the project addresses the urgent need for climate-resilient skills, innovation, and private sector engagement in Cambodia’s education system.</p> <p>The project will enhance entrepreneurial education as a catalyst for sustainable development by fostering institutional ecosystems that link universities with local enterprises and industry partners. Through capacity building and structured collaboration, Cambodian universities will pilot new internship pathways and reinforce the employability of graduates in sectors vital to environmental resilience and green growth.</p> <p>In parallel, AGGREGATE will modernize curricula by co-developing context-relevant case studies and integrating the EntreComp framework into entrepreneurship education. Innovative pedagogical approaches will be tested and refined to promote student-led problem solving, social innovation, and climate-conscious business development.</p>

	<p>The project will generate practical outputs—such as institutional models, training resources, and policy recommendations—intended to strengthen long-term collaboration between higher education and the private sector. These efforts will be supported by a comprehensive strategy for visibility, stakeholder outreach, and sustainability planning, ensuring that project benefits extend beyond the immediate consortium.</p> <p>By equipping Cambodian universities with the tools and partnerships needed to shape a green economy, AGGREGATE contributes to the EU Global Gateway's strategic objectives in Asia and supports Cambodia's commitment to climate resilience, skills development, and inclusive growth.</p>
